RE: NOTIFICATION OF PLANT CHANGES; OCCIDENTAL CHEMICALS CORPORATION, WICHITA PLANT; USEPA ID# KSD007482029

Dear Sir:

Enclosed please find a notification of a plant change, as required by Occidental Chemical Corporation's RCRA hazardous waste permit number KSD007482029 per *Section 1, I.E.10. Reporting Planned Changes.* The plan is to fill in Sump 426 which is located in the closed process area that was once the Pentachlorophenol Plant.

A concrete pad is being installed near Sump 426 for a 30,000 gallon air receiver. Due to its proximity to Sump 426 it is necessary to fill in the sump for drainage and accessibility. The railing and equipment will be removed and the sump will be filled in with concrete and the area will be leveled to maintain proper drainage. The project is scheduled to begin in late July. OCC understands this construction change doesn't officially close the SWMU; however the data indicates that all detections in the area are below action levels.

If you have any questions, please call Lisa R. Thurman at 316/529-7204.

A drawing and details for filling in the sump is attached for your review.

Sincerely,

Lisa R. Thurman

Lisa,

The sump is 6' x 6' x 4' deep with a lowered basin on the south end that is 1' wide by 1.5' deep. The total volume is 171 cubic feet.

We will use Flowable Fill, a very fluid cementitious slurry, to fill the sump to within 12" of grade level. The final 12" will be covered with a standard concrete containing 3/4" #57 aggregate.
